Description of Marine Protected Areas (MPAs) in Draft External MPA Proposal A
Created February 18, 2009
Revised March 18, 2009

Name of Proposal: External Proposal A_Round 1_090311
Author: Fishermen's Information Network

Total number of MPAs/closures: 40
Number of SMRs: 21
Number of SMCAs: 13
Number of SMPs: 4
Number of Military Closures: 2

MPA Name	MPA ID	Bioregion	MPA Boundaries (Exact or Approximate)	Designation	Level of Protection	Proposed Take Regulations	Other Proposed Regulations
DevereuxLagoon_SMR_FICFIN	5418	North Mainland	See MarineMap	SMR	TBD	All take is prohibited.	None Specified

MPA Name	Regional Goals/ Objectives	Site Specific Rationale	Other Considerations
DevereuxLagoon_SMR_FICFIN	G1: (O-1,O-2,O-3,O-4), G2: (O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-3,O-4)	Estuary environment opening into proposed SMR area to provide connectivity for larvae and juveniles of marine species. Closeness to research facilities at UCSB.	No real social-economic impact as this area is not heavily used for commercial or recreational extractive activities.
CampusPoint_SMR_FICFIN	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	This area though valuable for fishing interest contains a wide variety of habitat including many oil seeps. Proximity to UCSB campus provides multiple educational and research opportunities. Multiple species inhabit this area and entrance to an estuarine environment is covered by this MPA.	This MPA above all others has high educational value. Even though the economic impact of this area is high it keeps safer more important areas such as Naples and Carpinteria open to local fishing interests. Some connectivity to the Central Coast network may also be afforded by this location. Some concern over current kelp lease in this area.
Goleta Slough_SMCA_FICFIN	None Specified	None Specified	None Specified
MuguLagoon_SMCA_FICFIN	G1: (O-1,O-2,O-3,O-4), G2: (O-1,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	Include estuary environment for larvae and juveniles of marine species while providing protection for education and study.	Area is designated as an SMCA that will allow shore fishing that occurs at the base recreation enter at the opening of the lagoon. Minimal social-economic impact while providing habitat protection.
BigSycamoreCanyon_SMR_FICFIN	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	Covers current Big Sycamore Canyon SMR conforming to feasibility. Only area of pristine coastline in the region with a clean watershed. Leaves Mugu lagoon entrance which serves as a recreation area for the base open for the enjoyment of those that fish there. Provides connectivity along the network with valuable habitat.	Economic impact lessened by distance from harbors.
Malibu_SMR_FICFIN	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	This MPA covers area within Santa Monica bay by Malibu which provides for some habitat protection inside the Santa Monica Bay. Leaves pier open for local fishermen while protecting local habitat. Provides connectivity through the network to the other MPA areas.	Area has small near shore reefs that provide habitat for fish and large areas of soft bottom for halibut and juvenile rockfish. Bottlenose dolphins also frequent this area foraging on large schools of bait fish.
PortugueseBend_SMCA_FICFIN	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3,O-4), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	This MPA contains wide variety of habitat from shallow to deep including south facing headland environment. Easily distinguished mark the ends and Abalone Cove SMP is also replaced by this MPA which follows DFG feasibility guidelines. MPA protects area while still allowing bait seining fleet activities due to high economic value of fishery. Access by foot limited due to long trails and distance from harbors lowers recreational fishing pressure.	Seine fleet uses area for 50% of income therefore this activity will be allowed. Area may also contain hydrothermal vents and oil seeps. MPA minimizes commercial economic impact while keeping safe areas closer to harbors open for recreational fishermen.

CrystalCove_SMCA_FICFIN	G3: (O-1,O-2,O-3)	Modified the existing boundaries of Crystal Cove SMCA and simplified take regulations. Very important as a goal 3 MPA as local educational programs and enforcement efforts maintain this area. Boundaries have been created following feasibility guidelines of recognizable points and offshore whole minute lat/long corner connected by straight lines. Main goal is to preserve protection of inter-tidal species which local educational, recreational, and enforcement activities are based.	None Specified
Laguna_SMR_FICFIN	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	Most habitats required for replication, from shallow to deep are contained inside this MPA. Placement of this MPA may replace hodgepodge of current SMCA areas along the coast. Equidistant between Dana and Newport harbors leaves safe areas close to both harbors open.	This MPA represents a large compromise of fishing interests in the area and cannot be moved or expanded without major economical impacts to the local sport and commercial interests. Lobster fishermen are heavily impacted in this area by closing Pinnacles and Arches. In addition this keeps areas of high recreational impact such as Salt Creek, Seal rock, and Woods Cove open for local fishermen.

Compared to other regions in SD area, it is the only area that incorporates the true oceanic 100 fathom curve with rock structure and pinnacles, open to water flow from the open ocean. It is an underwater headland, allowing large coastal pelagics-swordfish, striped marlin, thresher sharks, white sharks, mako sharks easy access to inshore feeding and spawning grounds. This is also true for benthic fauna. The area provides Rockfish (Sebastes) spawning grounds, adult resting and feeding areas as well as larval settling area and juvenile feeding grounds.	Area is equidistant, but off the direct course line, from the ports of Oceanside and Mission Bay. This will reduce the impact of poaching, pollution and inadvertent habitat destruction by transiting commercial and recreational vessels. Area is well marked by estuary mouths and provides a link between two important lagoons, one of which is presently being developed as a mitigation project. Substantially sheltered from the effects of winter storms by the presence offshore of Catalina and San Clemente islands. This SMR is adjacent to the existing Torrey Pines State Park. Entire SMR is visible from a single point on land for enforcement.
